

# Citi Bike Analysis

Summer months are most popular.	Males use Citi Bike more often than females.	Females use Citi Bike longer per trip.	Most Citi Bike users are subscribers
---------------------------------	--	--	--------------------------------------

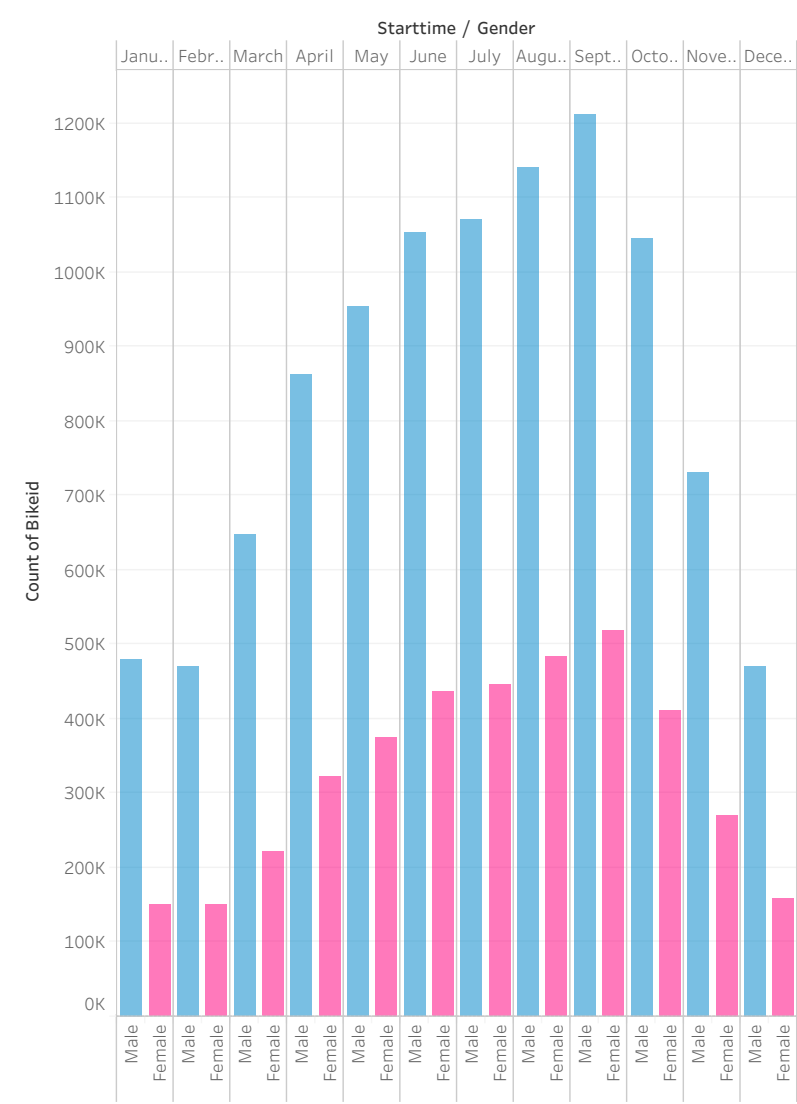

For the year of 2019 it is apparent the number of trips taken is highest in the summer months (through September) and quite low in the winter.

The lower graph shows the difference in users between each month. The users gradually increase through the beginning of the year as it gets warmer and then start to drop off as winter arrives.

# Citi Bike Analysis

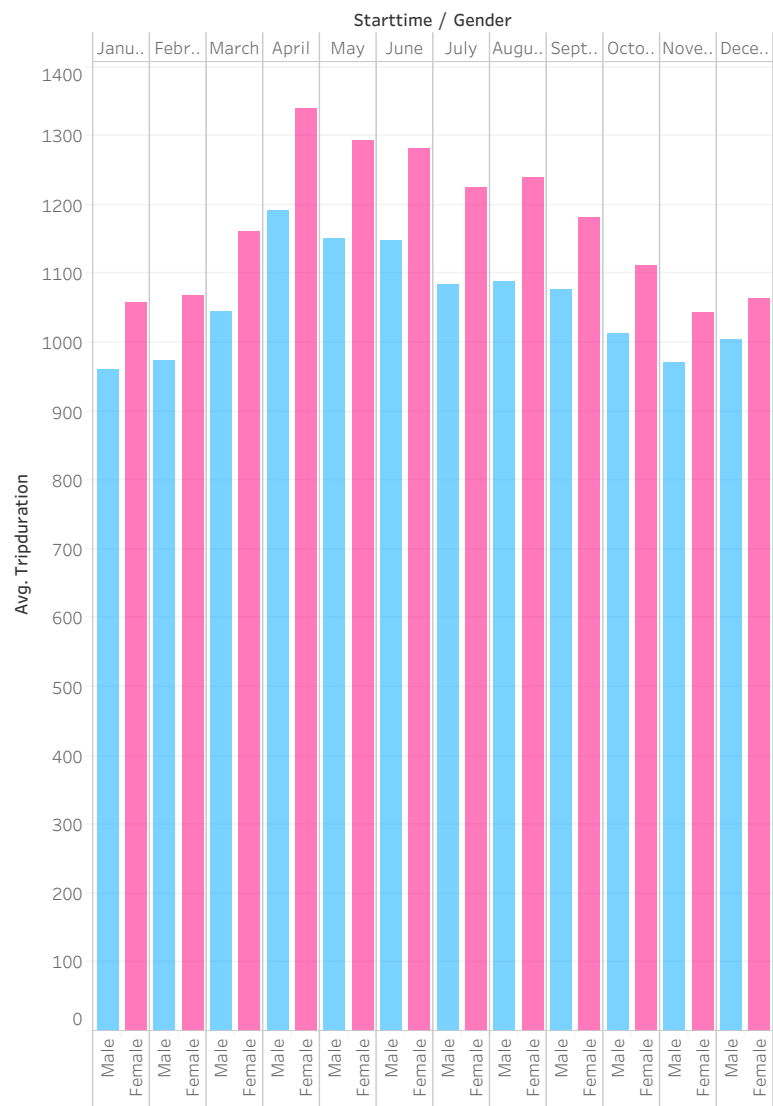

Summer months are most popular.	Males use Citi Bike more often than females.	Females use Citi Bike longer per trip.	Most Citi Bike users are subscribers
---------------------------------	--	--	--------------------------------------

According to gender data, male users prefer to use Citi Bike almost three times more than female users. It can also be noted that this trend matches the shape of the chart seen in the seasonal chart. Both genders are both more active in the summer months.

# Citi Bike Analysis

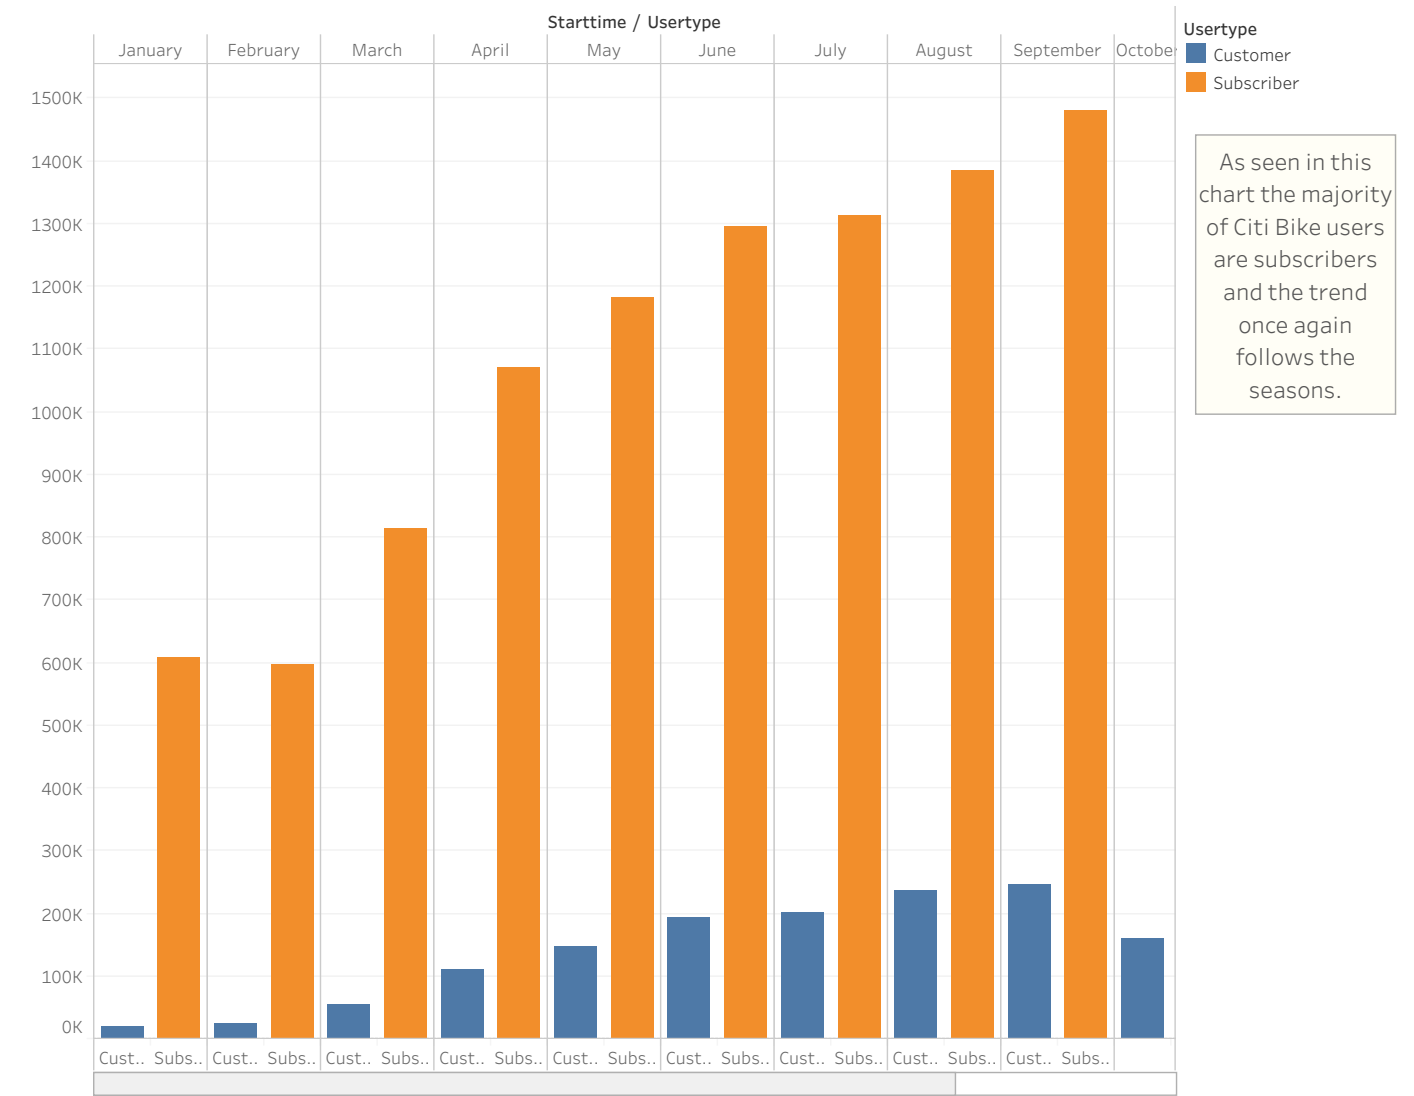

Summer months are most popular.	Males use Citi Bike more often than females.	Females use Citi Bike longer per trip.	Most Citi Bike users are subscribers	Peak use hours mimic business hours.
---------------------------------	--	--	--------------------------------------	--------------------------------------

While males may be more frequent users, females tend to have a higher average trip duration than males. This means that when females do choose Citi Bike, they use it for a longer amount of time on average than male users.
